CLUB MEETINGS

The Civitas Romana (Latin Club) and El Club Espanol (Spanish Club) held a joint meeting Friday, April 12, 1957, with Frank Hanenkrat, president of the Spanish Club, presiding. A most interesting program was presented by Mr. Le Roux, 9th grade English and 8th math teacher. Mr. Le Roux, who is a native of South Africa, demonstrated the importance of knowledge of languages by showing slides and commenting on them.

Among the many interesting slides he showed were scenes of the Pyramids in Egypt, beautiful mountain scenery in the Swiss Alps, and the jungles of Africa. Mr. Le Roux's program illustrated the importance of a knowledge of languages in these days of fast communication and convenient transportation.

ANNUAL HI-Y AND TRI- HI-Y MODEL GENERAL ASSEMBLY

The annual Model General Assembly held in Richmond, Virginia was a complete success this year.

To open the session, there was a joint meeting of both houses, in the House of Delegates. Among the hmonorable guests present were Governor Thomas B. Stanley and his wife.

The Governor of Virginia and the Youth Governor gave very inspiring talks to the session.

After the Model General Assembly adjourned for the evening, there was a reception given for us.

The next day the reporters were honored by being given the chance to interview the Youth Governor, Hillary F. Little, of Bridgetown, and Governor Thomas B. Stanley, of Stanleytown. Governor Stanley expressed the gratitude he felt towards all citizens of Virginia. He is deeply appreciative to us for standing behind him on many of the problems that face him.

That night there was a banquet in our honor at the Hotel Richmond. Then, we returned to the House of Delegates for the election of next year's officers. After this there was a social in the Winter Garden at Hotel Richmond.

The next day, after all the new officers were announced, the 1957 Model General Assembly adjourned.

NEW TYPE EYE BANK

New York.- Medical researchers recently announced that sight-giving "windows" for human eyes can be dried and preserved for two years to help some blinded persons. The corneas donated by persons who just died are dehydrated in glycerine, then kept in vacuum-sealed tubes at room temperature. Thin layers of these corneas have been grafted successfully into the eyes of persons whose own corneas were clouded or injured.
